Are you submitting on behalf of an organisation?

No, I'm submitting as an individual

Which age category are you in?

15– 24 years old

Do you wish to speak to your submission at a Council hearing?

No

Which bus fare structure option would you like to see trialled?

Option 1 (preferred): Fare-free for under 25s, students, Total Mobility and Community Services card holders

Tell us more about why you support the selected bus fare option.

I am a university student and with rising house prices etc I think having free public transport for people under 25 will encourage people to use such public transport more often as it will dramatically decrease spending for those who don't have as much money. It will also make public transport more desirable which will be good for the environment as there will be less cars on the road.

Is borrowing and repaying through general rates the right approach for this regionally significant event?

Don't know

Would you support a levy to accelerate action in response to climate change?

Yes

What current or future projects or activities would you like to see funded by such a levy?

Projects that see dramatic action to mitigate climate change as I don't think the government is doing as much as it could be to make NZ livable for generations to come. Climate change is a huge threat for everyone on a global scale and setting an example to the rest of the world would be very powerful.
