Sydenham, Christchurch						
Are you submitting on be	ehalf of an organisation?					
No, I'm submitting as an	individual					
Which age category are	you in?					
25-39 years old						
Do you wish to speak to	your submission at a Council hearing?					

No

Which bus fare structure option would you like to see trialled? I don't have a preference
Tell us more about why you support the selected bus fare option.
Actually I would prefer an mix of Option 2, where the zones are simplified and therefore made cheaper for the people in the outskirts. This should have the impact of it becoming more appealing for them to make the effort in taking the bus. But the prices for Zone 1 and Zone 2 can remain the same. Then I would add in stronger concessions for ANY Student , mobility and community services card holder. Free is pushing it. (e.g. \$1 fare)
Any other comments on bus fares?
Simple is good. Please keep the automatic daily/weekly caps. I love that I never have to calculate or worry about paying the best fares or worry ahead of time how much I will travel or not. Also the two hour transfer window is great. Please keep that too.
Is borrowing and repaying through general rates the right approach for this regionally significant event?
Don't know
How else might we pay for our share of this work?
DK
How do you think recovery from flooding of this scale – events that impact state highways, bridges, rail and power for example – should be funded in the future?
DK

Which option for distribution of rates in Ashburton River rating district do you support?

Any other comments on flood protection in Ashburton? Only did this submission for the bus Would you support a levy to accelerate action in response to climate change? Yes What current or future projects or activities would you like to see funded by such a levy? Where possible i would support projects that make things more efficient where ideally in the end the project will re-coup it's own costs in some shape or form. Any other comments on future funding for responding to climate change? This is a really big topic. Do what you need to. Do the right thing. The one in a hundred or one in a 50 events keep happening more or more often. Any other comments on Environment Canterbury's draft Annual Plan or other matters? Not right now. I prefer being given bitesized topics where you have options to pick from, not an empty canvas to give to me.	I don't have a preference
