Are you submitting on behalf of an organisation?

No, I'm submitting as an individual

Which age category are you in?

25-39 years old

Do you wish to speak to your submission at a Council hearing?

No

Which bus fare structure option would you like to see trialled?

Option 2: \$2 flat fare for adults and \$1.20 for children across bus zones 1, 2 and 3

Tell us more about why you support the selected bus fare option.

It is the best of all three, support for everyone rather than a select few.

Any other comments on bus fares?

I would like an incentive to actually take the bus. I took the bus for 6 months until it was too cold in winter and I found that it was actually cheaper for me to drive to and from work in the city each day while blasting a heater then it was to pay for bus travel and wait in the cold. For me to take the bus now I would need fairer cheaper prices to get into the city from kaiapoi park and ride. I am not a student and do not have a community services card and would like cheaper bus trips all round rather than for a select few. At this point in time the only incentive to take the bus is to reduce emissions however as the other option I have is cheaper it is a no brainer.

Is borrowing and repaying through general rates the right approach for this regionally significant event?

Yes

How else might we pay for our share of this work?

No Answer

How do you think recovery from flooding of this scale – events that impact state highways, bridges, rail and power for example – should be funded in the future?
