Subject: Submission on draft Annual Plan 2022/23

Anonymous User just submitted 'Draft Annual Plan 2022/23 submission' with the responses below.

First name

Jen

Last name

Kenix

Email address

Suburb

Lyttelton, Lyttelton

Phone number

Are you submitting on behalf of an organisation?

No, I'm submitting as an individual

Which age category are you in?

40-64 years old

Do you wish to speak to your submission at a Council hearing?

No

Which bus fare structure option would you like to see trialled?

Option 1 (preferred): Fare-free for under 25s, students, Total Mobility and Community Services card holders

Tell us more about why you support the selected bus fare option.

I think the majority of riders on the bus are students, and particularly under 25. When I ride it in mid-afternoon there are a lot more older people which seem to have a Senior bus card. While the bus fare is reasonable for a standard adult, it really adds up for frequent users. I am happy to pay the current fare because our family can afford it, but I think other families who may be struggling, this cost just adds to that struggle. Also occasionally young people forget to bring money or their card and that is a lot of pressure on them.

Any other comments on bus fares?

Please make the change to the Bus 29 going all the way from the airport to Lyttelton, make it electric, and more frequent, as was a prior submission. This will really help kids from schools across town.

Is borrowing and repaying through general rates the right approach for this regionally significant event?

Yes

How else might we pay for our share of this work?

Flood insurance

How do you think recovery from flooding of this scale – events that impact state highways, bridges, rail and power for example – should be funded in the future?

Flood insurance

Which option for distribution of rates in Ashburton River rating district do you support?

I don't have a preference

Would you support a levy to accelerate action in response to climate change?

Yes

What current or future projects or activities would you like to see funded by such a levy?

Better climate change policy in the building industry. More research and reduction of methane and CO2 in rural areas. Diversify our exports/imports to include more climate zero outputs. More solar, water reduction measures - rainwater, greywater management in new and existing buildings. Reduce minimum requirement size for housing. More electric transport.
