Are you submitting on behalf of an organisation?

No, I'm submitting as an individual

Which age category are you in?

25-39 years old

Do you wish to speak to your submission at a Council hearing?

No

Which bus fare structure option would you like to see trialled?

Option 2: \$2 flat fare for adults and \$1.20 for children across bus zones 1, 2 and 3

Tell us more about why you support the selected bus fare option.

It would benefit all of the community - not just the youngest and oldest.

Is borrowing and repaying through general rates the right approach for this regionally significant event?

Don't know

How else might we pay for our share of this work?

People are going to be breaking over the next few years with costs of living going up and it being harder to get on the property ladder - what isn't discussed is how long you have to make the repayment

How do you think recovery from flooding of this scale – events that impact state highways, bridges, rail and power for example – should be funded in the future?

build up a reserve over time

Would you support a levy to accelerate action in response to climate change?

Don't know

Any other comments on future funding for responding to climate change?

Its hard to be happy about paying more if there isn't concrete goals to be achieved and confidence in the efficiency of our system to administer funds is low. We don't want a higher levy just to pay for consultants to talk about it for 10 years rather than tangible outcomes.

Where did you hear about the consultation?
