Are you submitting on behalf of an organisation?

No, I'm submitting as an individual

Which age category are you in?

25-39 years old

Do you wish to speak to your submission at a Council hearing?

Yes

Which bus fare structure option would you like to see trialled?

Option 2: \$2 flat fare for adults and \$1.20 for children across bus zones 1, 2 and 3

Tell us more about why you support the selected bus fare option.

Rates are already ridiculously high and most people have community services cards with unemployment. \$2 across the board per one-way trip (or \$20 for bus fares to work and back for the week) is affordable for everyone providing they manage their money.

Any other comments on bus fares?

Keep it even across the board.

Is borrowing and repaying through general rates the right approach for this regionally significant event?

Don't know

Which option for distribution of rates in Ashburton River rating district do you support?

Option 2 (status quo): Keep the current distribution of rates in the Ashburton River rating district.

Would you support a levy to accelerate action in response to climate change?

No

Any other comments on future funding for responding to climate change?

Whatever happened to the idea of installing electric rail for transport throughout canterbury?

Any other comments on Environment Canterbury's draft Annual Plan or other matters?

If it is an option, look into buses that run on less fuel, seat the same number of people as the current buses, and are equally as safe. You'll save more on fuel in the long run and be environmentally friendly.
