Subject: Submission on draft Annual Plan 2022/23

Anonymous User just submitted 'Draft Annual Plan 2022/23 submission' with the responses below.

First name

Jennie

Last name

Down

Email address

Suburb

Cashmere, Christchurch

Phone number

Are you submitting on behalf of an organisation?

No, I'm submitting as an individual

Which age category are you in?

40-64 years old

Do you wish to speak to your submission at a Council hearing?

No

Which bus fare structure option would you like to see trialled?

Option 2: \$2 flat fare for adults and \$1.20 for children across bus zones 1, 2 and 3

Tell us more about why you support the selected bus fare option.

I support all people moving to using more environmentally friendly travel options and this would allow that. Having lived on a very busy road (Brougham Street in CHCH), I could feel the daily pressure on our roads and environment - and many of the vehicles had just one person in the vehicle. I think making travel by car harder and making using other options such as bicycle, rail and bus more accessible and affordable will encourage people to trial and use such options. I am an enthusiastic bus user and having to pay a little less would be wonderful!

Is borrowing and repaying through general rates the right approach for this regionally significant event?

Don't know

How else might we pay for our share of this work?

Create a business model which creates an income that is used for flood recovery related expenditure. Is there a water-based business where profit is earmarked for such projects?

Which option for distribution of rates in Ashburton River rating district do you support?

I don't have a preference

Would you support a levy to accelerate action in response to climate change?

Yes

What current or future projects or activities would you like to see funded by such a levy?

More thought on traffic movement - reductions on emissions and alternative modes of transport for people and especially freight (for eg - rail?). Greening more spaces, diversifying planting. Bird and native wildlife protection also.

Any other comments on future funding for responding to climate change?

Agriculture is a massive part of NZ culture - more work on reducing the impacts on our land in this area and improving soil quality - reducing soil erosion through education and local planting.

Where did you hear about the consultation?
