Are you submitting on behalf of an organisation?

No, I'm submitting as an individual

Which age category are you in?

25-39 years old

Do you wish to speak to your submission at a Council hearing?

No

Which bus fare structure option would you like to see trialled?

Option 1 (preferred): Fare-free for under 25s, students, Total Mobility and Community Services card holders

Tell us more about why you support the selected bus fare option.

I support anything that will get more people on the buses.

Any other comments on bus fares?

For most working people, I don't believe that money saved factors into their decision to bus or drive - it's unfortunately convenience. The bus is already pretty cheap

Is borrowing and repaying through general rates the right approach for this regionally significant event?

Don't know

How else might we pay for our share of this work?

People nearer likely flooding areas should pay more in rates. We should be encouraging people to retreat from flood zones as it will become more common with the climate crisis

Which option for distribution of rates in Ashburton River rating district do you support?

Option 1 (preferred): Redistribute rates in the Ashburton River rating district.

Any other comments on flood protection in Ashburton?

People who benefit the most from the flood protection i.e. those who live closest should pay more. We should be encouraging people to retreat from flood zones as it will become more common with the climate crisis

Would you support a levy to accelerate action in response to climate change?

Yes

What current or future projects or activities would you like to see funded by such a levy?

More tree planting. Cycleways. Public transport.

More of it!
