Subject: Submission on draft Annual Plan 2022/23

Anonymous User just submitted 'Draft Annual Plan 2022/23 submission' with the responses below.

First name

Ewout

Last name

van Bruchem

Email address

Suburb

Woolston, Christchurch

Phone number

Are you submitting on behalf of an organisation?

No, I'm submitting as an individual

Which age category are you in?

40-64 years old

Do you wish to speak to your submission at a Council hearing?

No

Which bus fare structure option would you like to see trialled?

Option 2: \$2 flat fare for adults and \$1.20 for children across bus zones 1, 2 and 3

Tell us more about why you support the selected bus fare option.

Bus fares should be as affordable as possible. In fact it should be even cheaper (\$1 like in Queenstown). the more people who opt to use the bus instead of a car the better. Car drivers should help pay for is (via fuel tax?)

Any other comments on bus fares?

We need urgent changes made to avoid even worse climate change outcomes!

Is borrowing and repaying through general rates the right approach for this regionally significant event?

No

How else might we pay for our share of this work?

Don't think it is fair everyone has to pay for this. If people chose to live in flood prone areas their rates should reflect this.

How do you think recovery from flooding of this scale – events that impact state highways, bridges, rail and power for example – should be funded in the future?

Recovery is different than protection work. Recovery should be paid by everyone (so from the national tax revenue)

Which option for distribution of rates in Ashburton River rating district do you support?

I don't have a preference

Any other comments on flood protection in Ashburton?

sorry. Don't know much about this

Would you support a levy to accelerate action in response to climate change?

Yes

What current or future projects or activities would you like to see funded by such a levy?

Subsidize public transport to a big extent. Build better cycling and pedestrian infrastructure. Solar panels on public buildings. more green space etc.

Any other comments on future funding for responding to climate change?

am unsure if you mean fubdubg for Ecan or more general for nation wide measures to resond to climate change. But can't emphasize enough that a lot more needs to be done. it should be top priority.

Where did you hear about the consultation?

Email
