Subject: Submission on draft Annual Plan 2022/23

Anonymous User just submitted 'Draft Annual Plan 2022/23 submission' with the responses below.

First name

Daniel

Last name

Woolley

Email address

Suburb

Leeston, Leeston

Phone number

Are you submitting on behalf of an organisation?

No, I'm submitting as an individual

Which age category are you in?

25-39 years old

Do you wish to speak to your submission at a Council hearing?

No

Which bus fare structure option would you like to see trialled?

Option 2: \$2 flat fare for adults and \$1.20 for children across bus zones 1, 2 and 3

Tell us more about why you support the selected bus fare option.

Greater accessibility for everyone, which could help spread cost/uptake demographics?

Any other comments on bus fares?

If it costs more per day to catch the bus, than drive and park in town, then cars will stay in favour. You need to find the sweet spot where it equal or less than bringing in the car... and nearly as convenient.

Is borrowing and repaying through general rates the right approach for this regionally significant event?

Yes

How else might we pay for our share of this work?

I would prefer sensible borrowing over selling land or assets. Borrowing is always a risk and poverty/debt at a regional level. Rates will need to not only take into account this event, but also events yet to/which may come.

How do you think recovery from flooding of this scale – events that impact state highways, bridges, rail and power for example – should be funded in the future?

Rates, government, insurance (local/central govt, and private/individual), givealittles? (people worldwide love this country, the south island has a lot of global cred. could we not launch global appeals to visitors past, and future?)

Which option for distribution of rates in Ashburton River rating district do you support?

I don't have a preference

Any other comments on flood protection in Ashburton?

No Answer

Would you support a levy to accelerate action in response to climate change?

Don't know

Any other comments on future funding for responding to climate change?

I would like to support a levy, but I want you to be the experts and tell me what you need to fund with the levy, and how you will measure it. I don't want to tell you what to fund/how to be the experts. Find the top 10, formulate a plan, get me (joepublic) excited, and I'll absolutely want to fund it. Then crack on, keep me updated & excited about what my engagement is helping to achieve..

Where did you hear about the consultation?

Word of mouth
