No, I'm submitting as an individual

No

Charge corporations and businesses who are contributing to weakening the stability of our land and accelerating the affects of climate change - petrol companies and distributors, meat and dairy farmers, etc.

---

**How do you think recovery from flooding of this scale – events that impact state highways, bridges, rail and power for example – should be funded in the future?**

Work with Central Government to create a Climate Crisis Scheme similar to EQC that is held at a national level that can be drawn on to pay for critical repairs to our infrastructure. This should be contributed to by corporations and businesses who are accelerating our planet's instability.

Option 1 (preferred): Redistribute rates in the Ashburton River rating district.

No

**Any other comments on future funding for responding to climate change?**

I don't trust Ecan to deliver appropriate action with these funds. In the past Ecan has favoured the interests of dairy and other stakeholders who have a vested interest over the public good.
