**Tell us more about why you support the selected bus fare option.**

The objectives of option 1 and 2 are very different - option 1 aims to reduce the financial burden on users who are already disadvantaged and option 2 has a greater environmental impact. In my view we should encourage greater use of public transport by new passengers who would otherwise choose to use their cars. Option 1 would reduce costs for groups who need it but would not necessarily lead to reduced use of cars. All of these groups are probably using the busses now. If we have to choose between the two options, on balance I believe option 2 is fairer and may attract more new users. I do not see what objective option 3 would achieve.
