Are you submitting on behalf of an organisation?

No, I'm submitting as an individual

Which age category are you in?

40-64 years old

Do you wish to speak to your submission at a Council hearing?

No

Which bus fare structure option would you like to see trialled?

Option 2: \$2 flat fare for adults and \$1.20 for children across bus zones 1, 2 and 3

Tell us more about why you support the selected bus fare option.

Everyone should contribute to the cost of public transport, even if it is a small amount. If someone doesn't pay it means someone else has paid for them

Is borrowing and repaying through general rates the right approach for this regionally significant event?

Yes

How else might we pay for our share of this work?

The local councils should be contributing as it is their area of responsibility

How do you think recovery from flooding of this scale – events that impact state highways, bridges, rail and power for example – should be funded in the future?

Roading is a government cost, power is the power company cost. All these services should be paid for by the group responsible for them

Which option for distribution of rates in Ashburton River rating district do you support?

Option 2 (status quo): Keep the current distribution of rates in the Ashburton River rating district.

Would you support a levy to accelerate action in response to climate change?

No

Any other comments on future funding for responding to climate change?

This needs to be paid for as and when it is required. We should not be paying for future events we haven't had

Any other comments on Environment Canterbury's draft Annual Plan or other matters?

Ecan need to be responsible with their current budget and stop constantly trying to increase rates.
