Subject: Submission on draft Annual Plan 2022/23

Anonymous User just submitted 'Draft Annual Plan 2022/23 submission' with the responses below.

First name

Amanda

Last name

Greenem

Email address

Suburb

Hornby South, Christchurch

Are you submitting on behalf of an organisation?

No, I'm submitting as an individual

Which age category are you in?

25-39 years old

Do you wish to speak to your submission at a Council hearing?

No

Which bus fare structure option would you like to see trialled?

Option 3: Tertiary student concession

Tell us more about why you support the selected bus fare option.

I'm a tertiary student studying via distance and therefore would like to make the most of using public library space for study. I have previously used busses to travel into the city but find the cost is => than the cost to use my hybrid car and pay for parking.

Any other comments on bus fares?

The cost to use public transportation is not conducive to allow tertiary students, community service card holders (most students have these) to use on a regular basis, even with a metrocard.

Is borrowing and repaying through general rates the right approach for this regionally significant event?

Yes

How do you think recovery from flooding of this scale – events that impact state highways, bridges, rail and power for example – should be funded in the future?

Reducing factors that cause climate related weather events should be top priority rather than the ambulance at the end of the cliff approach

Which option for distribution of rates in Ashburton River rating district do you support?

Option 1 (preferred): Redistribute rates in the Ashburton River rating district.

Any other comments on flood protection in Ashburton?

Big picture policy making, climate change reducing laws, and regional agriculture reduction to prevent land degradation

Would you support a levy to accelerate action in response to climate change?

Yes

What current or future projects or activities would you like to see funded by such a levy?

Reduced agriculture impacts, water degradation policies, reduction in irrigation use, alternative options to dairy industry explored.

Any other comments on future funding for responding to climate change?

The future is now.

Any other comments on Environment Canterbury's draft Annual Plan or other matters?

Climate change mitigation should be at the top of the agenda

Where did you hear about the consultation?

Social media (Facebook, Instagram)
