Are you submitting on behalf of an organisation?

No, I'm submitting as an individual

Which age category are you in?

65+ years old

Do you wish to speak to your submission at a Council hearing?

No

Which bus fare structure option would you like to see trialled?

Option 1 (preferred): Fare-free for under 25s, students, Total Mobility and Community Services card holders

Tell us more about why you support the selected bus fare option.

Get more people on buses and reduce emissions.

Any other comments on bus fares?

I would like to add a category for reduced or free fare and that is people who put bikes on the bus in Lyttelton and go one stop to get off at the Gondola - we need better access for people in Lyttelton to get their bikes through the tunnel and making us pay the full fare for into town for just going one stop seems wrong and to discourage bikes on the buses.

Is borrowing and repaying through general rates the right approach for this regionally significant event?

Don't know

How do you think recovery from flooding of this scale – events that impact state highways, bridges, rail and power for example – should be funded in the future?

Stop allowing people to build in flood prone zones.

Which option for distribution of rates in Ashburton River rating district do you support?

I don't have a preference

Would you support a levy to accelerate action in response to climate change?

Yes

What current or future projects or activities would you like to see funded by such a levy?

reducing carbon emissions by the ways that will drive return on investment

Any other comments on future funding for responding to climate change?

If we dont fund it now, we will be funding it later and a much higher cost

Where did you hear about the consultation?
