Yes

Which bus fare structure option would you like to see trialled?

Option 1 (preferred): Fare-free for under 25s, students, Total Mobility and Community Services card holders

Tell us more about why you support the selected bus fare option.

I think that option 1 is the most beneficial because of the savings that people will make especially in the current climate of so many price increases across the board. Along with this, the uptake in bus users will increase the most therefore emissions from cars decreasing the most out of all the options. Option 1 is the most successful because of the increase in the number of tonnes saved in the upcoming years. With an increase from 375t to 1360t the difference is clear.

Is borrowing and repaying through general rates the right approach for this regionally significant event?

Yes
