Are you submitting on behalf of an organisation?

No, I'm submitting as an individual

Which age category are you in?

25-39 years old

Do you wish to speak to your submission at a Council hearing?

No

Which bus fare structure option would you like to see trialled?

Option 2: \$2 flat fare for adults and \$1.20 for children across bus zones 1, 2 and 3

Tell us more about why you support the selected bus fare option.

I think the second one is best personally for me. I think the first option would be great if it wasn't just for under 25s cause there are many people under 30 who rely on public transport and don't have the funds for it. The second option would make it a bit easier for those in that awkward age gap of 24-30 who still aren't making the big bucks but are working their butt off in a full time job to make ends meet.

Any other comments on bus fares?

I think in general it's over priced right now for the amount of buses that are run and the times they run. There aren't many options. I could either be half an hour late to work or an hour early.

Is borrowing and repaying through general rates the right approach for this regionally significant event?

Don't know

How else might we pay for our share of this work?

Utilising advertising space on the buses. I haven't noticed as many buses with advertising on them as there use to be many years ago.

Which option for distribution of rates in Ashburton River rating district do you support?

I don't have a preference

Would you support a levy to accelerate action in response to climate change?

Yes

Any other comments on Environment Canterbury's draft Annual Plan or other matters?

Would love to see more electric buses! They're such an asset to the city!
