**To:** Have your Say  
**Subject:** Submission on draft Annual Plan 2022/23

Kate88 just submitted 'Draft Annual Plan 2022/23 submission' with the responses below.

**First name**

Kate

---

**Last name**

Whyte

---

**Email address**

---

**Suburb**

Lyttelton, Lyttelton

---

**Phone number**

---

**Are you submitting on behalf of an organisation?**

No, I'm submitting as an individual

---

**Which age category are you in?**

40-64 years old

---

**Do you wish to speak to your submission at a Council hearing?**

No

---

**Which bus fare structure option would you like to see trialled?**

Option 1 (preferred): Fare-free for under 25s, students, Total Mobility and Community Services card holders

---

**Tell us more about why you support the selected bus fare option.**

I hope that it will help reduce car use and also help with reducing costs of living for many who need it.

---

**Any other comments on bus fares?**

Can we have the trains reinstated and electrify public transport

---

**Is borrowing and repaying through general rates the right approach for this regionally significant event?**

Don't know

---

**How do you think recovery from flooding of this scale – events that impact state highways, bridges, rail and power for example – should be funded in the future?**

No Answer

---

**Would you support a levy to accelerate action in response to climate change?**

Yes

---

**What current or future projects or activities would you like to see funded by such a levy?**

Protecting native forests and encouraging regeneration of native habitats eg via community Trusts such as Banks Peninsula conservation Trust. Reducing fossil fuel use by electrifying public transport and making it cheap and efficient. Reinstating train transport for passengers. Promoting electric cars. Reducing coal use for institutional and commercial heating. Education about idiocy of outdoor heaters followed by a ban on them. Planning for relocation of activities that will not survive the impacts of climate change

---

**Any other comments on future funding for responding to climate change?**

Money needs to be invested on slowing climate warming, reducing social inequality and putting in place plans that ensure communities will be less vulnerable to future climate changes. Rather than shoring up existing infrastructure for continued status quo.

---

**Any other comments on Environment Canterbury's draft Annual Plan or other matters?**

Thank you for putting forward ideas to support our futures

---

**Where did you hear about the consultation?**
