Are you submitting on behalf of an organisation?

No, I'm submitting as an individual

Which age category are you in?

15– 24 years old

Do you wish to speak to your submission at a Council hearing?

No

Which bus fare structure option would you like to see trialled?

Option 1 (preferred): Fare-free for under 25s, students, Total Mobility and Community Services card holders

Tell us more about why you support the selected bus fare option.

I believe that free buses will change the culture of the city for the better, increasing the interconnectedness of our people.

Any other comments on bus fares?

I believe they should be free for all ages, as this small difference in cost should improve the usage of busses over cars.

Is borrowing and repaying through general rates the right approach for this regionally significant event?

Don't know

How else might we pay for our share of this work?

I'll be honest, I don't have an educated opinion on this matter.

How do you think recovery from flooding of this scale – events that impact state highways, bridges, rail and power for example – should be funded in the future?

Once again, not sure, sorry.

Which option for distribution of rates in Ashburton River rating district do you support?

I don't have a preference

Any other comments on flood protection in Ashburton?

Nope

Would you support a levy to accelerate action in response to climate change?

Yes

What current or future projects or activities would you like to see funded by such a levy?

Planting trees within the city would decrease both the CO2 produced as well as Ōtautahi/Christchurch's urban heat island.

Any other comments on future funding for responding to climate change?

This is an issue that will require our utmost attention, and spending money is a small price to pay.

Any other comments on Environment Canterbury's draft Annual Plan or other matters?

Nope

Where did you hear about the consultation?

Word of mouth
