Phone number

Are you submitting on behalf of an organisation?

No, I'm submitting as an individual

Which age category are you in?

40-64 years old

Do you wish to speak to your submission at a Council hearing?

No

Which bus fare structure option would you like to see trialled?

Option 2: \$2 flat fare for adults and \$1.20 for children across bus zones 1, 2 and 3

Tell us more about why you support the selected bus fare option.

\$2 is a very low price to pay, and with increasing fuel costs may tempt more in other demographics to try it. It also seems fairer than targeting a small section of the community. But there are no buses in my area so unfortunately I'm unlikely to be one of those trying the service out!

Any other comments on bus fares?

No Answer

Is borrowing and repaying through general rates the right approach for this regionally significant event?

Yes

How do you think recovery from flooding of this scale – events that impact state highways, bridges, rail and power for example – should be funded in the future?

Need to build a contingency fund, prevent new building in flood zones. This is only going to happen more often!

Which option for distribution of rates in Ashburton River rating district do you support?

I don't have a preference

Would you support a levy to accelerate action in response to climate change?

Yes

What current or future projects or activities would you like to see funded by such a levy?

Green burial sites to name one. Divert untreated building timber waste to charcoal production which can then be used in many ways <https://biochar-international.org/sustainability-climate-change/>

Any other comments on future funding for responding to climate change?

Should have started 20 years ago....
