Are you submitting on behalf of an organisation?

No, I'm submitting as an individual

Which age category are you in?

40-64 years old

Do you wish to speak to your submission at a Council hearing?

No

Which bus fare structure option would you like to see trialled?

Option 1 (preferred): Fare-free for under 25s, students, Total Mobility and Community Services card holders

Tell us more about why you support the selected bus fare option.

Public transport should be accessible to those who are most need it. I see so many buses driving through the city empty, when they could be utilised. If these buses were full, then it would take more cars off the road. I have picked up my fair share of people over the years who would benefit from the independence of free travel.

Any other comments on bus fares?

We have a responsibility for being environmental sustainability. The cost of unsustainable cars on the road, is the price the environment pays for high bus fares. I would happily pay higher rates to cover bus fares if it meant less cars on our roads! And would use the bus services a whole lot ore if it was more affordable for a whole family as well.

Would you support a levy to accelerate action in response to climate change?

Yes

What current or future projects or activities would you like to see funded by such a levy?

Happy for this to prioritised by experts in the field
