Are you submitting on behalf of an organisation?

No, I'm submitting as an individual

Which age category are you in?

65+ years old

Do you wish to speak to your submission at a Council hearing?

No

Which bus fare structure option would you like to see trialled?

I don't have a preference

Tell us more about why you support the selected bus fare option.

I strongly oppose any further targeted rates for public transport

Is borrowing and repaying through general rates the right approach for this regionally significant event?

No

How else might we pay for our share of this work?

If you managed the shingle build up in the rivers properly this work would not be necessary

How do you think recovery from flooding of this scale – events that impact state highways, bridges, rail and power for example – should be funded in the future?

It should be part of your normal daily work programme funded by general rates

Which option for distribution of rates in Ashburton River rating district do you support?

I don't have a preference

Any other comments on flood protection in Ashburton?

Maintain the river flow by eliminating half the irrigation would clear out debris and shingle build up. The Ashburton river has been destroyed through decades of mismanagement

Would you support a levy to accelerate action in response to climate change?

No

Any other comments on future funding for responding to climate change?

You've had years already to address climate change but instead have pandered to farmers instead of doing your job

Any other comments on Environment Canterbury's draft Annual Plan or other matters?

Please provide at least one express bus from Waimakariri during the day. Not everyone who lives out here commutes to a job, why would I stop driving and take the bus when it takes 50minutes against 20 driving on the new motorway.

Where did you hear about the consultation?
