Subject: Submission on draft Annual Plan 2022/23

Anonymous User just submitted 'Draft Annual Plan 2022/23 submission' with the responses below.

First name

joanna

Last name

wildish

Email address

Suburb

Avonside, Christchurch

Phone number

Are you submitting on behalf of an organisation?

No, I'm submitting as an individual

Which age category are you in?

40-64 years old

Do you wish to speak to your submission at a Council hearing?

Yes

Which bus fare structure option would you like to see trialled?

Option 1 (preferred): Fare-free for under 25s, students, Total Mobility and Community Services card holders

Tell us more about why you support the selected bus fare option.

I have teenagers who bus to school, when my eldest was at highschool, there were days when we didnt have enough money for bus fares, we didnt have petrol in the car and he didnt have a bike, his school was too far to walk to so he would have to skip school, I imagine that we are not alone in this. Lack of money should not be a reason to miss out on attending public school, free bus fares would help with this.

Any other comments on bus fares?

If buses were free it would definitely encourage our family to bus more, it would make the inner city safer for biking too.

Is borrowing and repaying through general rates the right approach for this regionally significant event?

Don't know

Which option for distribution of rates in Ashburton River rating district do you support?

I don't have a preference

Any other comments on flood protection in Ashburton?

Plant trees, stop cutting trees down, help slow down climate change.

Would you support a levy to accelerate action in response to climate change?

Don't know

Any other comments on future funding for responding to climate change?

Stop cutting down trees. Plant trees. Plant fruit trees for food forests to help families that are struggling with rental increases and rising food costs and to fight against climate change. Plant native trees, plant strong trees, look after the trees we already have and don't let investors and developers cut down established forests and trees. Protect all trees.

If you would like to give feedback via video, add a link to YouTube clip or Dropbox file below
