Are you submitting on behalf of an organisation?

No, I'm submitting as an individual

Which age category are you in?

15– 24 years old

Do you wish to speak to your submission at a Council hearing?

No

Which bus fare structure option would you like to see trialled?

Option 3: Tertiary student concession

Tell us more about why you support the selected bus fare option.

As a university student, I don't have a lot of money. As I don't own a car, I get around the city via bike and public transport. As such, I am greatly impacted by the price of bus trips and I spend a not-insignificant portion of my income on bus fares. Option 3 would allow me to save a lot of money and would be very beneficial. On top of this, the positive climate impacts of taking the bus over driving in a car are well known. Lower fares for tertiary students is a good way to increase public transport usage which is vital for a carbon neutral future. Please make these changes to cut bus fares for tertiary students.

Is borrowing and repaying through general rates the right approach for this regionally significant event?

Don't know

Would you support a levy to accelerate action in response to climate change?

Yes

What current or future projects or activities would you like to see funded by such a levy?

Reducing our funding focus on road building, and instead transform more public areas to pedestrian access only.
