Are you submitting on behalf of an organisation?

No, I'm submitting as an individual

Which age category are you in?

15– 24 years old

Do you wish to speak to your submission at a Council hearing?

No

Which bus fare structure option would you like to see trialled?

Option 1 (preferred): Fare-free for under 25s, students, Total Mobility and Community Services card holders

Tell us more about why you support the selected bus fare option.

For a lot of young people (especially students), as well as the elderly, the bus system is their main way to get around. These are also our two sectors with the least amount of disposable income. Abolishing bus fares for these people would help a lot of people in financial hardship

Is borrowing and repaying through general rates the right approach for this regionally significant event?

Don't know

Which option for distribution of rates in Ashburton River rating district do you support?

I don't have a preference

Would you support a levy to accelerate action in response to climate change?

Yes

What current or future projects or activities would you like to see funded by such a levy?

Restricting the amount of fossil fuels that organisations can release. Putting in more environmental legislation for companies and businesses to follow.

Any other comments on future funding for responding to climate change?

Air pollution and climate change are largely the fault of corporations and businesses, not the citizens. Punish these organisations for putting the younger generations through the wringer all so they can make a profit.
