You are going to have to have a slower network for the use of ev vehicles which is where the world and that means us are headed therefore the timaru suburbs need plenty of give way signs plenty of watch for children signs and plenty of markings on the road plus great smooth rds in the suburbs as this is where family with said ev vehicles will live,as for the heavier transport that should be straightforward and show a point a to b giving directions to port a to b giving directions to hiihway and keep it minimal,all you need is a clear insight where getting in the truck yourself with a carrier will give you,the planner and yourself passenger in the transport trucks and see the roads clearly to garner what a truck and a rd needs. Thankyou.
