**Subject:** Regional Land Transport Plan submission

Anonymous User just submitted the survey 'Draft Regional Land Transport Plan submission' with the responses below.

**First name**

John

---

**Surname**

Kruiniger

---

**Email address**

---

**Are you giving feedback on behalf of an organisation?**

No

---

**Select your local city or district council:**

Christchurch City Council

---

**Tell us how important each of these objectives is to you:**

|             |                |
|-------------|----------------|
| Maintenance | Very important |
| Resilience  | Important      |
| Emissions   | Not important  |
| Growth      | Important      |
| Safety      | Not important  |
| Freight     | Neutral        |

---

**If you think we should consider other objectives, please describe what they are and why they should be considered:**

Cost. Develop a design and choose plans that minimize cost.

---

**Target 1: 40% reduction in deaths and serious injuries on Canterbury roads by 2030**

Reducing deaths by building roads is like reducing blisters by building tramping tracks. The blisters get reduced by better shoes [cars] and better educations/decisions by walkers [drivers]. This should not be a target.

---

**Target 2: 41% reduction in greenhouse gas emissions from land transport in Canterbury by 2035**

This sort of thing needs to be done at a global level; what CCC does is irrelevant. This should not be a target.

---

**Target 3: 100% increase in tonnage of freight moved by rail in Canterbury by 2034**

Would be nice.

---

**Tell us how important each of these priorities is to you:**

|   |                |
|---|----------------|
| Create a well-maintained network                                    | Very important |
| Manage risk of exposure to extreme events                           | Important      |
| Support and develop connected public and active transport networks  | Neutral        |
| Implementing safer systems (Road to Zero)                           | Not important  |
| Support and develop freight systems connecting to air, rail and sea | Important      |

---

**Are there specific actions you think should be taken to help achieve these priorities?**

Make better spending decisions.

---

**Do you support investigating alternative approaches to fund transport system improvements?**

No

---

**What sources of funding do you think could be used to pay for regionally significant improvements:**

lay off staff and save their salaries. Buy fewer road cones. Dispense with 90% of those stop/go men.

---

**Are these the right measures of success?**

No, these are not the right measures.

---

**Are there other monitoring indicators or measures of success that you think should be included?**

Feedback from motorists, giving a score whether they are happy or not with the roads.

---

**Would you like to speak to your submission at a hearing in March?**

No

---
