Bring back EV subsidies Introduce "proper" WOF testing for old bangers and get them off the road Based on

**Target 3: 100% increase in tonnage of freight moved by rail in Canterbury by 2034**

Based on what I've been told by a NZ Rail employee this is ridiculously unachievable unless Billions are spent on track upgrades Something we currently cannot afford within the Government's budget

Tell us how important each of these priorities is to you:

Create a well-maintained network	Very important
Manage risk of exposure to extreme events	Important
Support and develop connected public and active transport networks	Not very important
Implementing safer systems (Road to Zero)	Neutral
Support and develop freight systems connecting to air, rail and sea	Important

No, these are not the right measures.

**Are there other monitoring indicators or measures of success that you think should be included?**

Stop subsidising inefficient transport "solutions"
