Subject: Regional Land Transport Plan submission

Anonymous User just submitted the survey 'Draft Regional Land Transport Plan submission' with the responses below.

First name

Susan

Surname

Ibbetson

Email address

Are you giving feedback on behalf of an organisation?

No

Select your local city or district council:

Hurunui District Council

Tell us how important each of these objectives is to you:

Maintenance	Very important
Resilience	Very important
Emissions	Important
Growth	Important
Safety	Very important
Freight	Important

Tell us how important each of these priorities is to you:

Create a well-maintained network	Very important
Manage risk of exposure to extreme events	Important
Support and develop connected public and active transport networks	Very important
Implementing safer systems (Road to Zero)	Very important
Support and develop freight systems connecting to air, rail and sea	Important

Are there specific actions you think should be taken to help achieve these priorities?

Better road laying. Maintenance is at best temporary and results in far more chipped windscreens than should happen. Also road crews to remove disused speed signage so people know the speed they should be travelling at not second guess it. Speed cameras with signage at accident hotspots. Remove complicated road user charge from diesel and just tax as for petrol. We have no public transport in Hurunui so any development of that would have the potential to reduce emissions and increase road safety.

Do you support investigating alternative approaches to fund transport system improvements?

Yes

What sources of funding do you think could be used to pay for regionally significant improvements:

Replace RUC with tax in diesel.

Are these the right measures of success?

Don't know

Would you like to speak to your submission at a hearing in March?

No
